EDUCATION

B.Sc. Microbiology
University of Lagos, 2024

REFERENCE

Available upon Request

PROFILE

Creative and detail-oriented Frontend Engineer with background in graphic design and UI/UX. Proficient in React js, Typescript and Tailwind CSS with a strong foundation in UI/UX design principles. Experienced in creating visually appealing and user-friendly designs, now developing interactive and responsive web applications.

PROJECTS

LafiaMoms

Aug 2025 - Feb 2026

Frontend Engineer and UI/UX designer

<https://lafiamoms.com>

- Contributed to the design and development of the LafiaMoms platform, focusing on delivering a seamless and user-friendly experience
- Designed wireframes, user flows, and high-fidelity UI interfaces for key product features
- Built responsive and interactive user interfaces using modern frontend technologies (React-js, Typescript, Tailwind CSS)
- Collaborated closely with developers, product stakeholders, and content teams to translate requirements into functional designs
- Improved overall UI/UX by refining layouts, navigation, and visual hierarchy across the platform
- Implemented design consistency through reusable components and style guidelines
- Optimized the platform for responsiveness across mobile, tablet, and desktop devices
- Contributed to feature development and iteration based on user needs and feedback

Green Emerald Educational Services

Jan 2026 - Feb 2026

Frontend Engineer and UI/UX designer

<https://emeraldbooksng.com/>

- Designing user-friendly UI/UX for educational content presentation
- Building responsive interfaces using React, TypeScript, TailwindCSS
- Integrating Sanity CMS for managing books, series, and assets
- Implementing dynamic routing for individual book pages
- Structuring content for scalability across multiple educational levels
- Optimizing performance and deployment workflows

Health Assur Ltd.

May 2025 - Present

Application Support Engineer

<https://healthassur.com>

- Revamped and improved the company's WordPress website, enhancing overall UI/UX and user experience
- Customized and extended WordPress functionality to meet business and user needs
- Integrated payment platforms to enable seamless and secure online transactions

SOFT SKILLS

- Problem-solving
- Creativity & Design Thinking
- Attention to Detail
- Adaptability
- Communication

EDUCATION

B.Sc. Microbiology
University of Lagos, 2024

REFERENCE

Available upon Request

- Identified and resolved website issues, improving performance, responsiveness, and usability
- Collaborated with internal teams to implement new features and optimize existing workflows
- Provided ongoing technical support, ensuring website reliability and minimal downtime
- Managed content updates and ensured consistency across web pages
- Troubleshoot bugs and implemented fixes to improve system stability
- Enhanced mobile responsiveness across devices

Emerald Publishers Website

<https://emerald-publishers.vercel.app/>

- Designed and developed a professional publishing website with a clean layout.
- Implemented a structured HTML and CSS framework for intuitive navigation.
- Ensured mobile responsiveness using CSS Grid and Flexbox.
- Used JavaScript to enhance interactivity and improve user experience.

Space Tourism Website

<https://space-tourism-website-tau-three.vercel.app/>

- Created an engaging, futuristic-themed landing page for a space tourism service.
- Designed and implemented custom animations for an immersive user experience.
- Utilized JavaScript for interactivity, enhancing navigation between sections.
- Optimized layout for cross-device compatibility with responsive design techniques.

Investment Calculator (React, JavaScript, CSS)

<https://investment-calculator-seven-indol.vercel.app/>

- Developed a fully functional investment return calculator to help users estimate potential returns on investments over time.
- Implemented a dynamic input system that allows users to input principal amount, interest rate, and investment duration.
- Designed an intuitive UI with interactive charts and real-time calculations for better data visualization.
- Used React state management to handle user inputs and update the results dynamically.

Todo List App (React, JavaScript, CSS)

<https://my-todolist-10.vercel.app/>

- Built a task management application to help users organize their daily tasks.
- Implemented features such as task addition, completion status, and deletion.
- Used local storage to retain tasks between sessions.
- Designed a clean and minimalistic UI for easy usability.
